

SCHOOL HEALTH E-NEWSLETTER

Te Kura Hauora Rorohiko Panui

Term 2 2018

Regional Public Health's School Health & Immunisation Group
Hutt Valley, Wellington, Porirua and Wairarapa regions. Please forward to all school staff.

Regional Public Health
HAUORA Ā IWI KI TE ŪPOKO O TE IKA A MĀUI
Better health for the greater Wellington region

Our aim is to support students with their health and improve their learning outcomes.
We will inform you of 'hot health topics' and how to recognise evidence versus sensationalism!

> Car Seats/Booster Seats

Under New Zealand law, all children under seven years of age must use an approved child restraint appropriate for their age and size. Children aged seven must be secured in a restraint if one is available in the vehicle.

Requirements for child restraints (Car/Booster Seats):

AGE OF CHILD:	THE LAW SAYS YOU MUST:
Until their 7th birthday	Correctly secure your child in an approved child restraint.
From their 7th to their 8th birthday	Correctly secure your child in an approved child restraint if one is available in the vehicle (and if not, in any child restraint or safety belt that is available).
From 8th birthday to 14 years old	Must use safety belts if available. If not available, they must travel in the back seat.
Over 14 years old	Must use safety belts where they are available.

International best practice recommends the use of an appropriate child restraint (or booster seat) until your child reaches 148cm tall or is 11 years old.

Further information can be accessed [HERE](#).

> Immunisations

In term two the School Based Immunisation Nurses will be holding clinics once again. This term we will be primarily vaccinating Year 7 students. Year 7's receive the Boostrix immunisation, which includes Tetanus, Diphtheria and most importantly Pertussis (Whooping Cough).

We will also offer any Year 8 students who missed their HPV vaccine the opportunity to have the HPV vaccine at school.

If you have any queries or need more information please don't hesitate to contact the team on 587 2949.

> Hand washing

Washing hands with soap, followed by thorough drying - an equally important step - helps reduce the spread of colds and other illnesses in children. This in turn reduces absenteeism from school.

Having warm water for hand washing encourages and supports children to wash their hands.

[HERE](#) is a link to a poster that can be ordered through our RPH Resource Centre.

> Influenza

What is the Flu?

The flu is another name for influenza and it can be a serious illness that is sometimes fatal. Those at greatest risk are the very young, elderly or those people with a suppressed immune system. It is caused by a virus and spreads through the air (droplets) when people sneeze, cough or touch with dirty hands. The incubation period is 2-5 days and symptoms include, high fevers 38°C lasting several days, coughing and a sore chest, severe exhaustion and aches and pains.

How to tell the difference between the flu and a cold:

FLU	COLD
Sudden onset moderate to severe illness	Mild illness
Fever usually very high	Mild fever
Headaches (may be severe)	Mild headache, congested sinus's
Dry cough - may become moist	Sometimes a cough
Muscle aches and shivering	Muscle aches are uncommon
Bed rest is needed	Runny nose
Severe complications such as pneumonia	

Preventing the Flu is a community responsibility

- Stay at home if you are unwell.
- Hand washing especially after handling tissues, before preparing food, smoking and eating.
- Cover your mouth and nose with a tissue when coughing and sneezing.
- Get the flu vaccine (The immunization will be available at your GP or ask your work place).

DON'T LET THE FLU BUG YOU IN 2018.

WE can all help in preventing the Flu.

CATCH IT: Cover your face when you cough or sneeze.

BIN IT: Throw away used tissues straight away.

KILL IT: Clean your hands thoroughly and often.

Annual vaccinations reduce the risk of flu, speak to your GP now.

> Influenza vaccination

The influenza vaccine is available now at your GP or Pharmacist. This vaccine protects against 4 flu strains including the "Aussie flu strain" that has been severe in Australia, USA and UK.

Immunisation and good hygiene remain our best line of defence in preventing an outbreak and spread of the illness.

The vaccine is free for pregnant women, older people and those with certain medical conditions.

More information is available on the Regional Public Health [WEBSITE](#).

> Health education resources

The Regional Public Health Resource Room stocks public health resources to educate the community about keeping well and preventing disease. They are sourced from the Ministry of Health and other public health agencies around New Zealand.

Ordering resources

Order Ministry of Health resources free online through the HealthEd [WEBSITE](#).

Wellington region

Anyone is welcome to visit the Health Education Resource Room to view and take resources. We are located on Level 1 of the Community Health Building, Hutt Hospital. Opening hours are Monday to Friday, 8am to 4.30pm.

We post regular newsletters on the Regional Public Health [WEBSITE](#) about new or revised resources. Have a look under Resources > Health Information Centre > Newsletters.

Resources can also be accessed by contacting:
Laurina Francis | Ph: 04 570 9691 | Fax: 04 570 9211
Email: laurina.francis@huttvalleydhb.org.nz

Wairarapa

We also have resources available at our Wairarapa office reception - come and visit us at 9 Russell Street, Masterton.

You can also contact:

Liz Apiata | Ph: 06 377 9111 | Fax: 06 377 5813
Email: liz.apiata@wairarapa.dhb.org.nz

Public health alerts

From time to time there are outbreaks of diseases like mumps, measles, whooping cough and tummy bugs.

PUBLIC HEALTH ALERTS are sent out by email to primary care providers in the greater Wellington region, detailing current health concerns. If you would like to receive these alerts, please [EMAIL](#) Regional Public Health.

> Health check for your house

Well Homes is a healthy housing programme working in your area. If you are concerned about how cold and damp your home gets in winter – please make contact with us. We can help.

If you have a Community Services Card, or think you may qualify for one, we can provide you with a free health check for your house.

Talk to your school Public Health Nurse, or ring us, [EMAIL](#) us, or message us on [FACEBOOK](#) if you would like to know more.

Note: This service is not available in the Wairarapa.
