## Worried about measles?

You may have heard there are measles outbreaks around the world at the moment, including here in New Zealand. Measles can be dangerous for children and adults.

Please get your children vaccinated at 15 months and 4 years old to prevent measles. It’s free at the doctor.

If you or your child has not had a measles vaccine, please see your doctor.

The symptoms of measles are a fever, runny nose, cough, red eyes, then a rash. You can spread measles to others from five days before, until five days after, the rash appears.

Been close to someone with measles? Or showing symptoms? **Stay at home and call your doctor or Healthline (0800 611 116)** for advice. Healthline has interpreters – when your call is answered, say you’d like an interpreter and the language you’d like to speak in.

*Measles Fact Sheet adapted from Auckland Regional Public Health Service Fact Sheet*

*If you or your child is unwell, call your family doctor or Healthline on 0800 611 116 for free advice from a registered nurse 24 hours a day 7 days a week.*
